# What is Simon Says Game?

Simon Says is a memory game. The Arduino lights up LEDs in a sequence, and the player has to repeat the same sequence by pressing the correct buttons. Every successful round adds one more step, making the game harder.

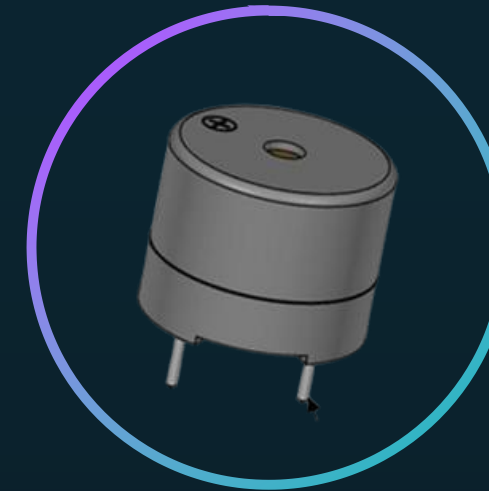

# Tools Used

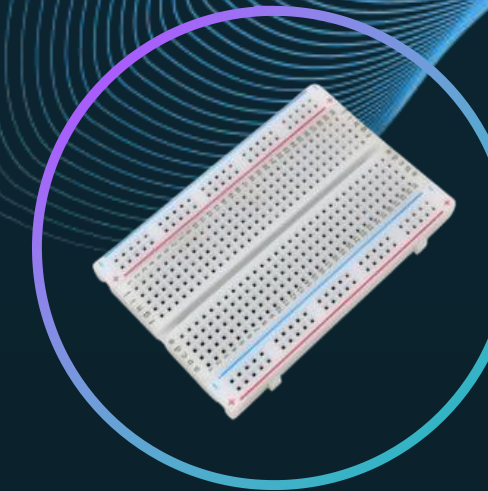

**4 LEDs**

**4 Buttons**

**1 Buzzer**

**1 Breadboard**

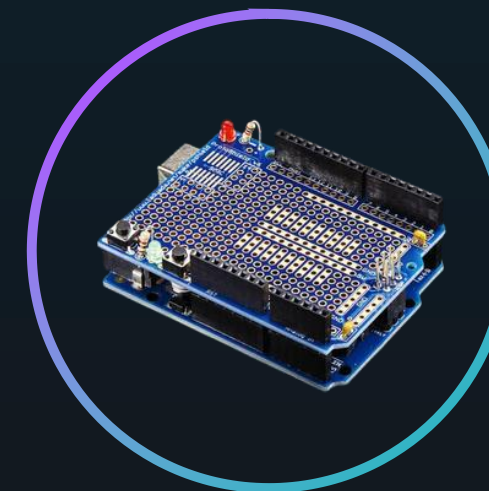

**1 LCD**

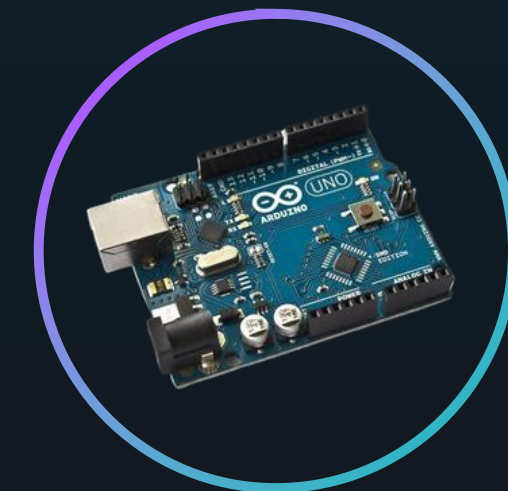

**22 male\_male  
Wires**

**4 (3.3) k  
Resistors**

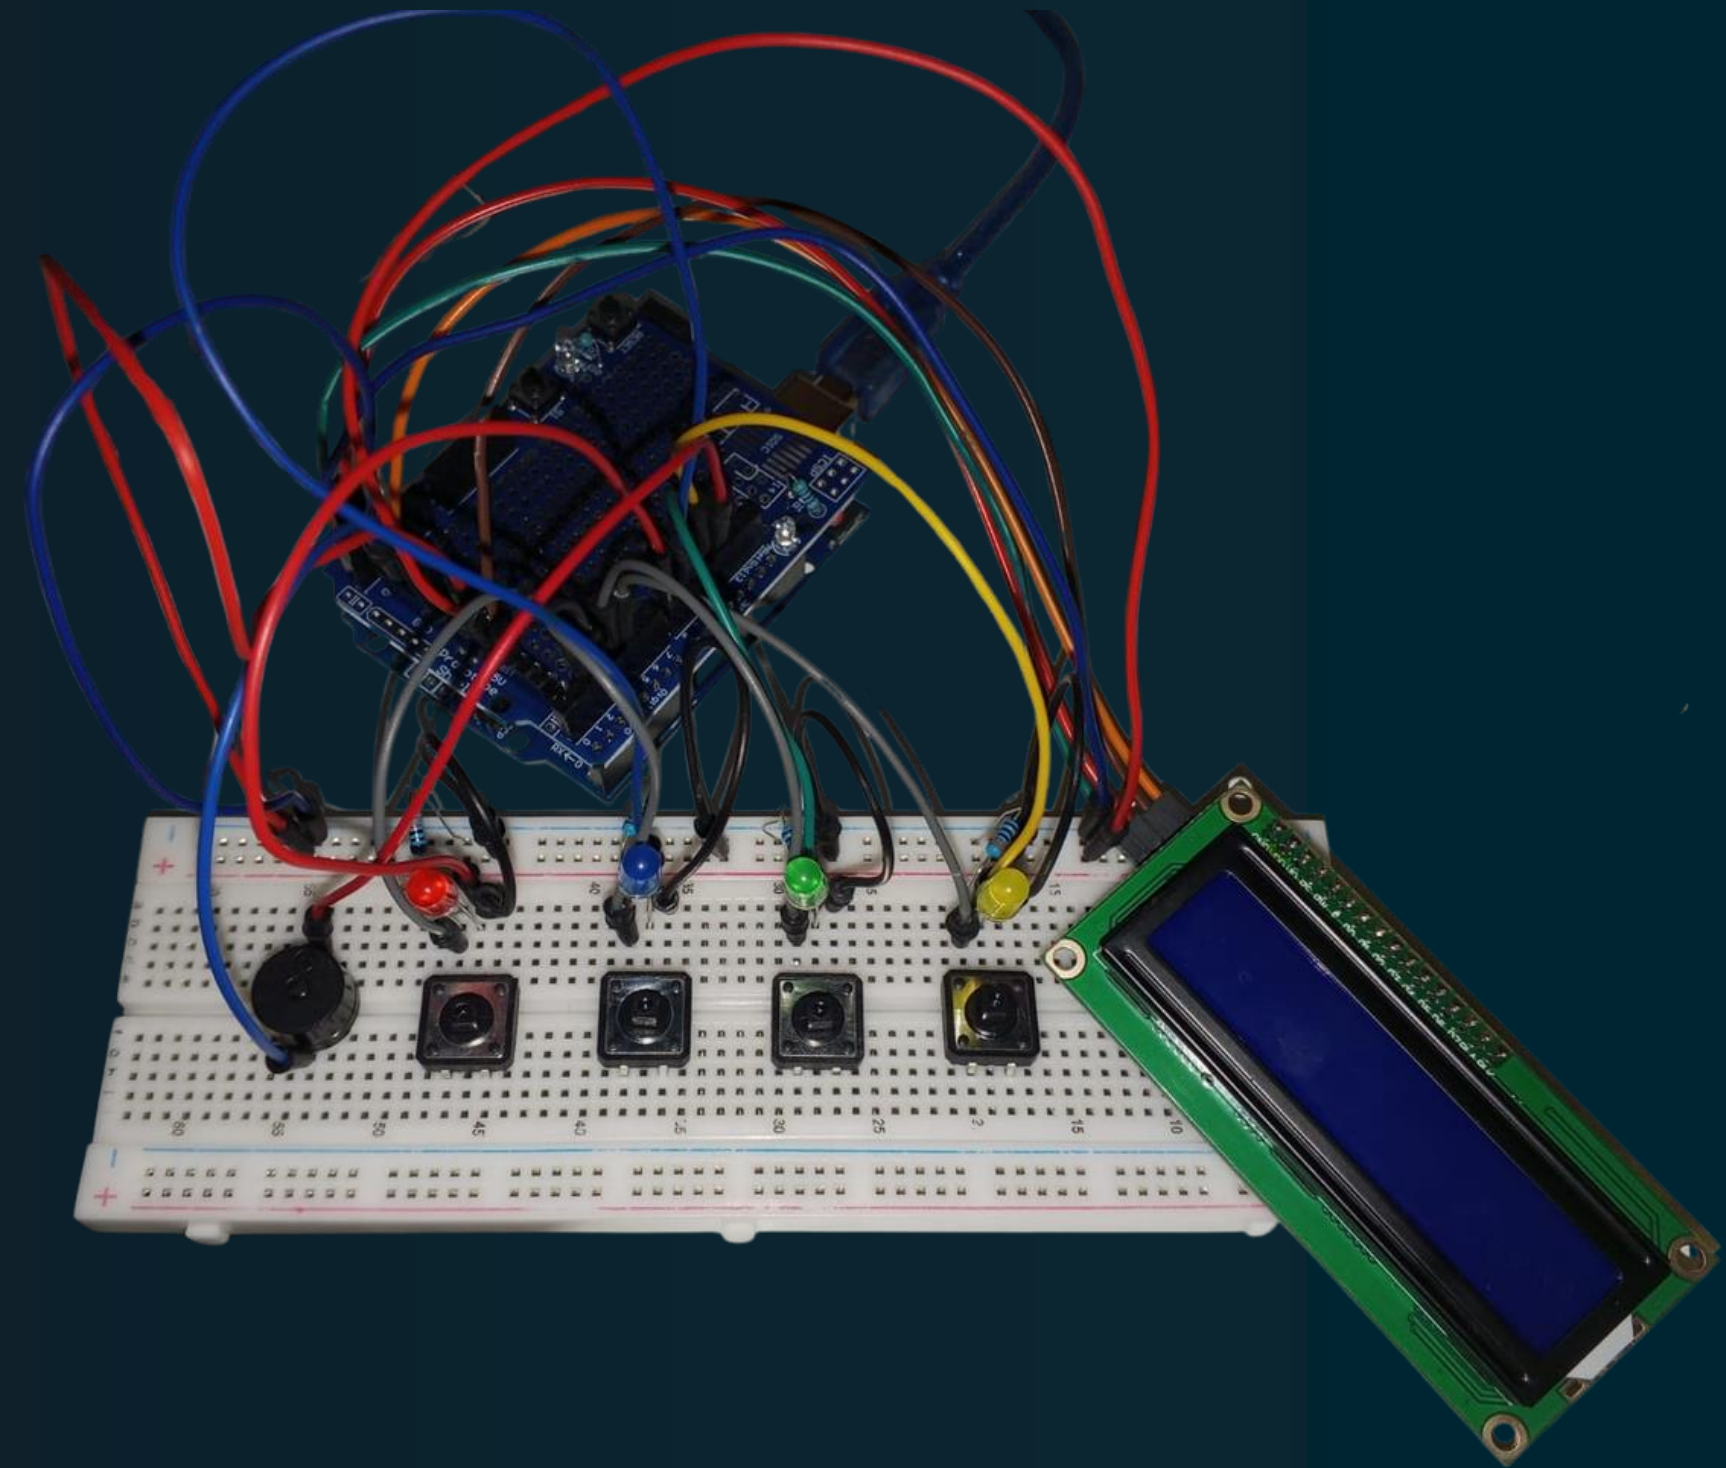

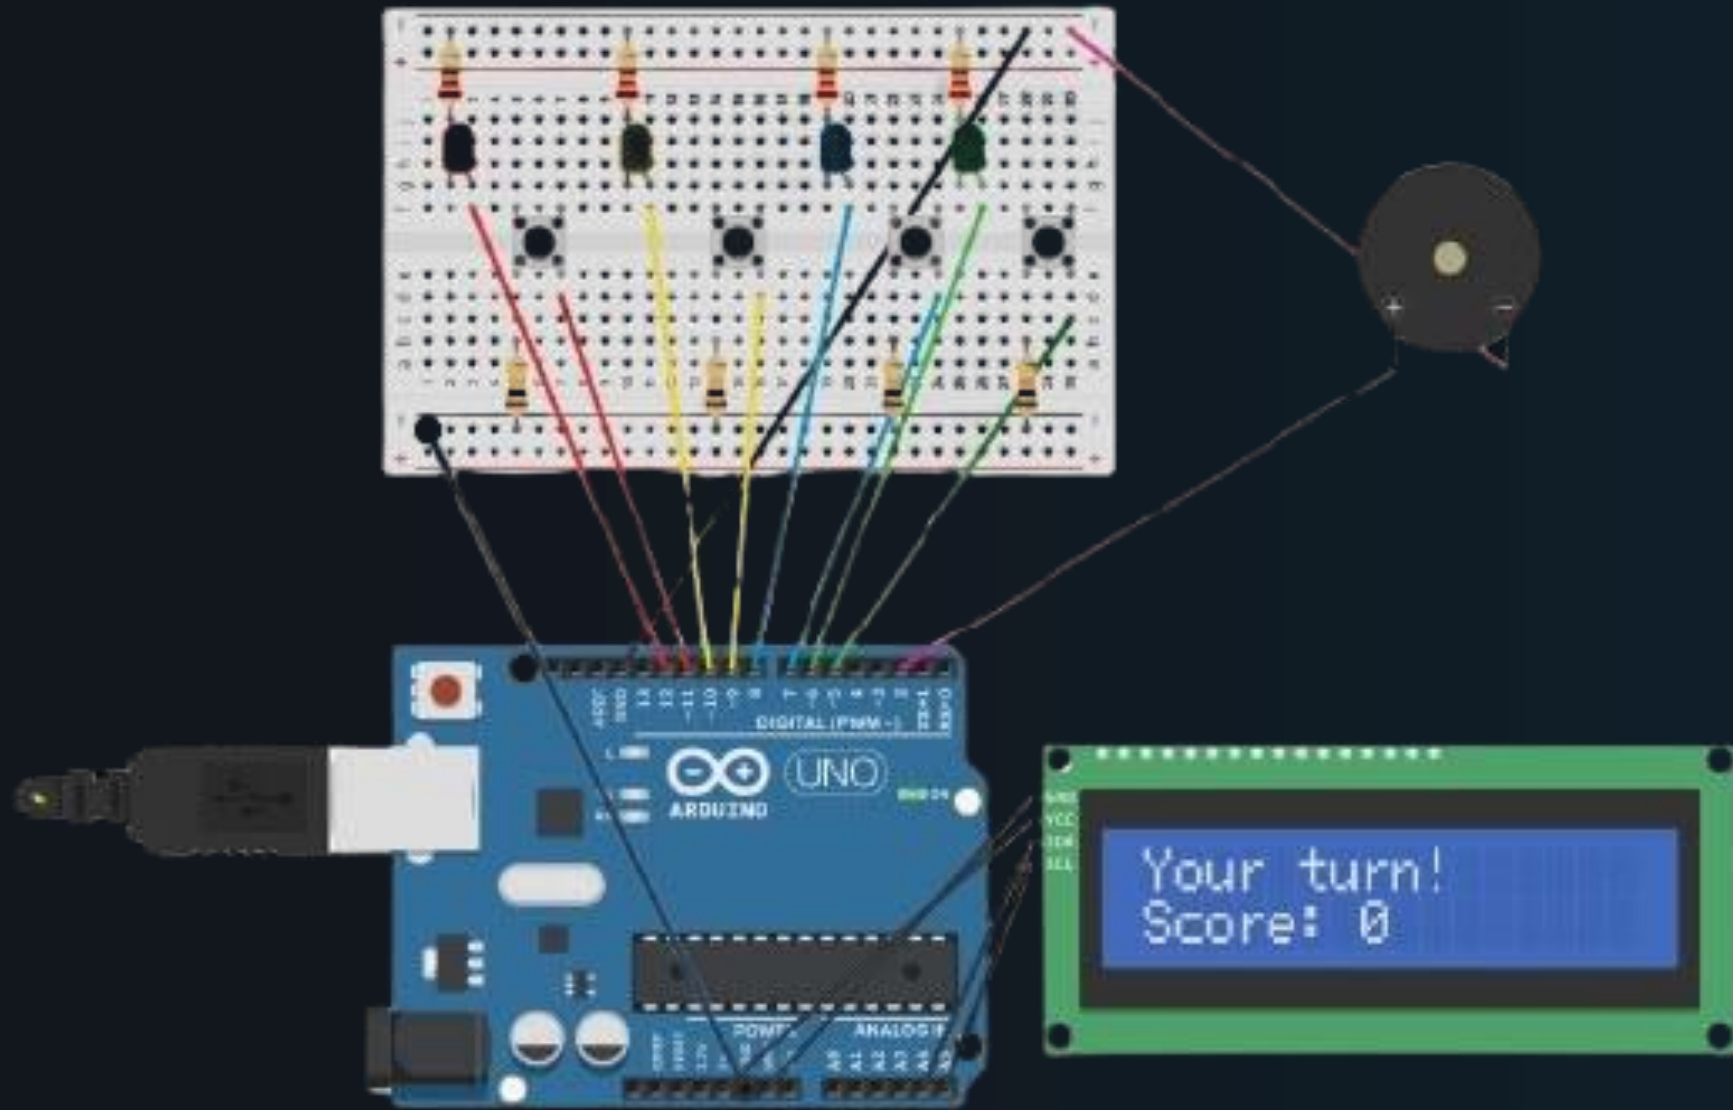

**1 Prototype**

**1 main board**
